

2012/2013 Draft Transmission Loss Adjustment Factor (TLAF)

Publication Note

July 3rd 2012

Version 0.3

Background

On June 26th 2012, the Regulatory Authorities published a decision paper SEM-12-049 regarding TLAFs for the island of Ireland. This decision states that a compressed TLAF would be calculated annually by the System Operators on an ongoing basis.

Methodology for 2012/13

The set of TLAFs that accompanies this short note has been calculated using the compressed approach, similar to that used in 2011/2012, but updated for the period October 2012 to September 2013. There are a number of new participants who are listed for the first time e.g. East-West Interconnector.

Response

If you have any comments or queries on the draft set of TLAFs please contact:

For NI participants: Helen Magorrian on Helen.Magorrian@soni.ltd.uk

Or

For ROI participants: Mark Needham on mark.needham@eirgrid.com

Note that all responses will be published at the end of the consultation apart from those which are marked confidential. This consultation ends on July 31st 2012.
