

East West Interconnector Trading Update Workshop

REGISTRATION

EirGrid is pleased to invite you to our upcoming East West Interconnector Trading Update [Workshop](#) on **Wednesday 23rd November 2011 @ 9:30am**, in Croke Park, Dublin.

The East West Interconnector is a 500 MW regulated HVDC link which will be fully compliant with all EU legislation and provide an increased opportunity to market participants to trade electricity between the Single Electricity Market (SEM) on the island of Ireland and British Electricity Trading and Transmission Arrangements (BETTA) market in Great Britain. The East West Interconnector is scheduled to be operational in Q3 2012.

The purpose of this workshop is to inform relevant stakeholders of the progress to date of the East West Interconnector development, to preview the East West Interconnector Auction Management Platform (AMP) including details on the product suite and to provide information on Access Rules and Registration.
